Jolene Gruber, Project Coordinator
Wisconsin Deafblind Technical Assistance Project
124 2nd St., Room 35
Baraboo, WI 53913

Dear Ms. Gruber,

The Indiana DeafBlind Services Project is excited to commit to a collaborative relationship with the Wisconsin Deafblind Technical Assistance Project. Such a relationship will allow for the sharing and trading of product development and/or training services.

A needs assessment of families, service providers and educators in Indiana will be used to determine specific training topics and/or services for collaboration. Examples of services would include training on topics identified in the needs assessment or engagement of family members in activities and support systems. Examples of products would include the development of facts sheets, slide show trainings, or other materials that could be branded by each individual project and amended to meet the needs of each state.

Our partnership will help to conserve human and fiscal resources which will allow us to further expand opportunities for those we serve. We are excited for the opportunity to work together in support of individuals who are DeafBlind.

Sincerely,

Lisa Poff, Director
Indiana DeafBlind Services Project
